---

Fullstack Developer with 3+ years of experience building scalable web applications using Angular and Spring. I've worked across freelance and agile team projects, applying clean architecture, microservices, and accessibility standards. I enjoy delivering high-quality interfaces and robust APIs, with a strong focus on performance, testing, and maintainability on both frontend and backend.

## WORK EXPERIENCE

---

### Senior Sistemas

Feb. 2024 – Present

*Software Developer*

*Hybrid (Brazil)*

- Worked across three key areas of the Talent Acquisition platform: Talent Portal Job Board, Recruitment & Selection, and Onboarding.
- Increased Angular test coverage by 25%+, encouraging a stronger testing culture.
- Refactored endpoints in the legacy system, improving response time by 40%.
- Led accessibility initiatives, applying WCAG standards and delivering internal presentations and technical documentation.
- Developed scalable backend features using Spring and Hexagonal Architecture in a multi-tenant environment.

### Philips

May, 2022 – Sep, 2023

*Software Engineering Intern*

*Hybrid (Brazil)*

- Contributed to the Tasy medical system, with a focus on the Finance and Accounting modules.
- Participated in development across Delphi, Java Swing, and Angular/Spring platforms.
- Played a key role in migrating ~10 complex features to a new internal Angular-based technology.
- Reduced the bug backlog across multiple systems through proactive maintenance and direct client support.
- Created technical documentation for environments and processes, improving team efficiency.

### Freelance

Feb, 2022 – Sep, 2023

*Software Developer*

*Remote*

- Delivered custom projects for clients worldwide via Fiverr, 99Freelas, Upwork, and Workana, focusing on automation and web solutions.
- Used technologies like Python, JavaScript, and web frameworks to build tailored tools.
- Managed full project lifecycle: requirements, development, testing, and delivery.
- Maintained constant communication and delivered thorough technical documentation.
- Earned top ratings across platforms, reflecting commitment to quality and client satisfaction.

## EDUCATION

---

### Unicesumar

Dec, 2025

*Software Engineering Bachelor*

- Core topics: Programming, Architecture, Data Structures, Calculus, Databases, Software Planning & Management.

### Instituto Federal Catarinense

Feb, 2022

*IT Technician (Integrated with High School)*

- Topics included: Programming, Databases, Networking, Software Engineering, Computer Fundamentals.

## SKILLS & INTERESTS

---

### Hard Skills:

- **Frontend:** Angular, TypeScript, JavaScript, HTML, CSS, Tailwind, Bootstrap, Sass, Karma, Jasmine, RxJs
- **Backend:** Java, Spring Boot, Microservices, Hexagonal Architecture, Clean Architecture, SQL, PostgreSQL, Oracle, PLSQL
- **Dev Tools:** Git, Argo, Kibana, Postman, Swagger
- **Testing:** JUnit, Mockito, Jasmine, Karma
- **Other:** Python (automation), Agile (Scrum, SAFe), Jira

### Soft Skills:

- Problem-solving
- Analytical thinking
- Organized and punctual
- Fast learner and adaptable
- Proactive and quality-driven

**Languages:** Portuguese (Native), English (Advanced – daily use in code and documentation)

**Interests:** Movies, games, volleyball, baking, cooking
